Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1617

Claims 1-6 are pending in this application which claims benefit of US Provisional Application 60/425,816, filed November 13, 2002.

Applicant's claims are drawn to a method of enhancing inhibition of plant growth by mixing herbicide (glyphosate, claim 6), and isopropylammonium sulfate (claim 1) for the control of various plants (claims 2-5).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6 are rejected under 35 U.S.C. 102(a) and (b) as being anticipated by Hay (AU-B-80459/94; cited in IDS).

Hay teaches aqueous herbicidal compositions comprising glyphosate and mono-(C₁ to C₆)-alkylammonium sulfate (claim 1), such as isopropylammonium sulfate (p. 6, Example 1). The compositions are applied for weed control (p. 8). Inasmuch as the same components claimed herein are present in the compositions of Hay, the same effect (i.e., enhancing inhibition of plant growth) would occur when the components are mixed and applied to plants, as was disclosed in Hay.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1617

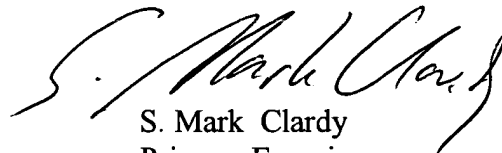

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hay (cited above). Hay discloses that it was known in the herbicidal art to formulate glyphosate with isopropylammonium sulfate and apply it to weeds. Applicant's specific plant species were not disclosed in Hay; however, glyphosate is a well known nonselective postemergent herbicide with an extensive spectrum of activity, thus it is effective for killing a wide range of plants. One of ordinary skill in the herbicidal art would have expected the composition used herein to kill the recited plants.

No unexpected or unobvious results are noted; no claim is allowed.
